Tear off form and submit to BRSAR.
Our Primary Mission is the rescue or recovery of people and property for the RCMP.

BRSAR members work under the direction of the RCMP who determine when a situation requires the services of Search & Rescue. An RCMP liaison works with our Search & Rescue Manager throughout the situation.

BRSAR is on call to perform searches across Alberta. Our members have been involved in searches throughout Central Alberta.

BRSAR’s primary task is to perform ground searches. If required, we will provide on-site First-Aid/CPR and consultation with medical personnel. Without BRSAR, the RCMP would not have the resources nor manpower to perform this vital service.

Public Awareness Programs
BRSAR offers educational programs to groups that are designed to bring safety awareness and instruction to children, students and service groups. Please contact us for more information.

Membership - field
BRSAR is always looking for new members, without whom we could not provide our services. We need people who have a strong desire to help others - people who are committed to serving their community - people like you.

Our volunteers work long hours, get bruised and bumped, they undergo fatigue, frustration and anxiety, they sweat... and ultimately, they experience a deep inner feeling of satisfaction for a job well done.

To participate, each volunteer is expected to pay annual membership dues, attend monthly meetings, trainings and information sessions. Each member must obtain a current First Aid/CPR certificate, instruction in the use of map and compass as well as a mandatory 40-hour Basic SAR Course.

Additional courses are often offered, including Mantracking, Swift Water Rescue, ATV Training, Civil Emergency Response along with many, many more!

Membership - support
Not interested in tramping through the wood? Support members are an integral part of our group - logistics, communications, instruction... Call us to find the role for you!

This may sound like a lot of work - but remember the ultimate goal is to save a life. Can there be a more worthy goal than that?
